Technical Data Sheet
NTL TDS 173-1.1

WATER BASED GRAPHITE LUBRICANT
AQUA G

Product Overview
Aqua-G is a fine particle size dispersion of graphite in water, especially suitable where a smooth dry lubricating film is required on a variety of substrates to provide a parting/anti stick medium, dry boundary lubrication or conductive properties.

Features and Benefits
- Clean drying
- Pure Graphite coating
- Does not attract dust or debris like oil based products
- Is not flammable
- Suitable for use up to and above 600°C

Typical Applications
- Die Lubricant for Forging Industry
- Hot Drawing Lubricant for Tungsten Wire
- Die Casting Lubricant
- Gasket Parting Medium
- Dry Lubricant
- Graphite Chain Lubricant

Directions for Storage and Use
Aqua-G may be diluted from between 4 parts water to 1 part product to 20 parts water and 1 part product depending upon the application.

Specific information can be given upon request.
Shake Well Before Use
Store in original, sealed container
Shelf life - Minimum 12 Months
